WASHINGTON D.C.’S E-BIKE LAW

WASHINGTON D.C.’S E-BIKE LAW FOR THE ROAD

» In D.C., an e-bike is defined as a “motorized bicycle” so long as the e-bike has operable pedals, can be operated under combined human and motor power and has a maximum speed of 20 mph.

» The same rules of the road apply to both e-bikes and human-powered bicycles.

» E-bikes are not subject to the registration, licensing or insurance requirements that apply to motor vehicles.

» You must be 16 years or older to operate an e-bike.

* The following D.C. laws are referenced: D.C. Code § 18:99-01; § 50:1501.01-03; D.C. Act 19-658

eMTB GUIDELINES

» On federal, state, county and local trails, e-mountain bike (eMTB) access varies significantly.

» Generally, any natural surface trail that is designated as open to both motorized and non-motorized uses is also open to eMTBs.

» eMTBs may not be allowed on trails managed for non-motorized activities.

» Do not ride your eMTB in areas where the local rules are unclear. Ride legally and only on authorized trails to show that mountain bikers are responsible trail users.

» When in doubt, ask your local land manager about access to specific trails. Local land rules change frequently.

WASHINGTON D.C.’S E-BIKE LAW FOR TRAILS

D.C. is surrounded by public recreation lands, including National Park Service (NPS) trails. Secretarial Order #3376 directed the NPS to incorporate e-bike policies into each Superintendent’s Park Compendium. Class 1 and 3 e-bikes are currently permitted wherever bikes are allowed at Rock Creek Park and the National Mall near D.C. PeopleForBikes will update this document as needed. Always check with your local park before riding.

With an e-bike, bicyclists can ride more often, farther, and for more trips.

Electric bicycles are designed to be as safe as traditional bicycles, do not compromise consumer safety, and benefit bicyclists who may be discouraged from riding a traditional bicycle due to limited physical fitness, age, disability or convenience.

In many states, e-bikes are regulated under antiquated laws primarily aimed at combustion engine vehicles such as mopeds or scooters. PeopleForBikes is clarifying state laws governing the use of e-bikes in the U.S. Every state’s law is different, but the objective is to ensure that low-speed e-bikes are regulated similarly to traditional, human-powered bicycles.
